GREEN COLLECTION

PFAS-Free Packaging Solutions

Sabert®
Green Collection

WHAT ARE PFAS?

Per and polyfluoroalkyl substances (PFAS) refer to a general class of fluorochemicals that are used across a variety of everyday products and applications, including food packaging.

WHY ARE PFAS USED?

PFAS have historically been used in food packaging due to the strong oil and grease resistance that they provide. They help to prevent packaging from becoming soggy and breaking down when holding oil/grease rich foods.

WHY ARE PFAS BEING BANNED?

Due to the amount of time PFAS remain in the environment, the long-term health and safety implications of these chemicals have come into greater focus. In an effort to reduce the long-term risks associated with PFAS chemicals, states are passing legislation banning the use of intentionally added PFAS in food packaging.

PFAS FREE

No intentionally added PFAS

Look for this logo to identify pulp products that have transitioned to PFAS-free.

Sabert has made a commitment to not intentionally add PFAS to our products. Through innovation, Sabert has developed enhanced formulations with non-fluorine based additives to provide solutions that comply with legislation while meeting the performance expectations of our customers.
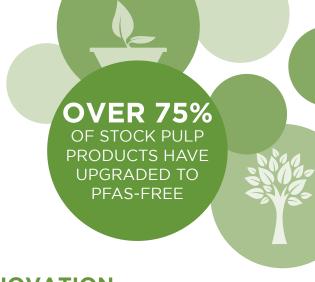

Sabert
® makes food look great®

PFAS-FREE TRANSITION

At Sabert, we have always made food safety and innovation a top priority. As a responsible food packaging manufacturer, it is imperative to address the concern over the use of PFAS in food packaging. With food safety as a top priority, we are committed to the development and commercialization of evolved food packaging products.

PFAS- Free Natural Molded Fiber Pulp is food packaging made from plant-based renewable resources without the use of fluorinated chemicals.

OVER 75%
OF STOCK PULP PRODUCTS HAVE UPGRADED TO PFAS-FREE

SABERT'S CENTER FOR INNOVATION

Sabert's Center for Innovation team is re-imagining products, processes and systems to develop the next generation of compostable materials through developing new and proprietary material blends and product formulations. With research, fresh thinking, expertise and cutting-edge manufacturing technology Sabert is able to accelerate new product development and offer the best performing products in the market. With our roots as a food-packaging manufacturer combined with our Center for Innovation, Sabert is helping to advance the next generation of compostable products.

LEARN MORE ABOUT OUR AVAILABLE MATERIAL FORMULAS

STANDARD PULP
Standard pulp is our stock PFAS-Free solution. Standard pulp works well for immediate consumption and less oily food types.

PULP PLUS™
Pulp Plus™ is enhanced with improved moisture resistance, and longer shelf life in refrigerated applications.

PULP MAX™
Pulp Max™ is our ultimate pulp solution which provides outstanding resistance to moisture, oil and grease.

STANDARD PULP

Standard pulp is our stock PFAS-Free solution. Standard pulp works well for immediate consumption and less oily food types.

- Suitable for a wide variety of food applications, including cold and warm foods
- Microwavable
- Oven safe (Up to 400F for up to 30 minutes)

Refrigerator safe
for 24 hours

Low oil resistance
for under 30 minutes

PULP PLUS™

Pulp Plus™ is enhanced with improved moisture resistance, and longer shelf life in refrigerated applications.

- Standard pulp features with enhanced moisture resistance

- Reduces "soggy" bottoms with warm foods

- Pairs well with indirect oil contact or with oil-absorbing foods, like greens, grains and starches

- Ideal for refrigerated grab-n-go food applications and supermarkets

Refrigerator safe
for 4-7 days

Low oil resistance
for under 30 minutes

IDEAL FOOD APPLICATIONS

PASTA   TACOS   SOUP   BURRITO BOWLS
