PFAS-Free Packaging Solutions

WHAT ARE PFAS?

Per and polyfluoroalkyl substances (PFAS) refer to a general class of fluorochemicals that are used across a variety of everyday products and applications, including food packaging.

WHY ARE PFAS USED?

PFAS have historically been used in food packaging due to the strong oil and grease resistance that they provide. They help to prevent packaging from becoming soggy and breaking down when holding oil/grease rich foods.

WHY ARE PFAS BEING BANNED?

Due to the amount of time PFAS remain in the environment, the long-term health and safety implications of these chemicals have come into greater focus. In an effort to reduce the long-term risks associated with PFAS chemicals, states are passing legislation banning the use of intentionally added PFAS in food packaging.

No intentionally
added PFAS

Look for this logo to identify
pulp products that have
transitioned to PFAS-free.

Sabert has made a commitment to not intentionally add PFAS to our products. Through innovation, Sabert has developed enhanced formulations with non-fluorine based additives to provide solutions that comply with legislation while meeting the performance expectations of our customers.

PFAS-FREE TRANSITION

At Sabert, we have always made food safety and innovation a top priority. As a responsible food packaging manufacturer, it is imperative to address the concern over the use of PFAS in food packaging. With food safety as a top priority, we are committed to the development and commercialization of evolved food packaging products.

PFAS- Free Natural Molded Fiber Pulp is food packaging made from plant-based renewable resources without the use of fluorinated chemicals.

SABERT'S CENTER FOR INNOVATION

Sabert's Center for Innovation team is re-imagining products, processes and systems to develop the next generation of compostable materials through developing new and proprietary material blends and product formulations. With research, fresh thinking, expertise and cutting-edge manufacturing technology Sabert is able to accelerate new product development and offer the best performing products in the market. With our roots as a food-packaging manufacturer combined with our Center for Innovation, Sabert is helping to advance the next generation of compostable products.

LEARN MORE ABOUT OUR AVAILABLE MATERIAL FORMULAS

STANDARD PULP

Standard pulp is our stock PFAS-Free solution. Standard pulp works well for immediate consumption and less oily food types.

PULP PLUS™

Pulp Plus™ is enhanced with improved moisture resistance, and longer shelf life in refrigerated applications.

PULP MAX™

Pulp Max™ is our ultimate pulp solution which provides outstanding resistance to moisture, oil and grease.

STANDARD PULP

Standard pulp is our stock PFAS-Free solution. Standard pulp works well for immediate consumption and less oily food types.

- Suitable for a wide variety of food applications, including cold and warm foods
- Microwavable
- Oven safe (Up to 400F for up to 30 minutes)

Refrigerator safe for 24 hours

Low oil resistance for under 30 minutes

IDEAL FOOD APPLICATIONS

SALADS

GRAIN BOWLS

SANDWICHES

FRUIT SALADS

COMPOSTABLE
IN INDUSTRIAL FACILITIES

Check locally, as these do not exist in many communities.
CERT # 10528471

PULP PLUS™

Pulp Plus™ is enhanced with improved moisture resistance, and longer shelf life in refrigerated applications.

- Standard pulp features with enhanced moisture resistance
- Reduces “soggy” bottoms with warm foods
- Pairs well with indirect oil contact or with oil-absorbing foods, like greens, grains and starches
- Ideal for refrigerated grab-n-go food applications and supermarkets

Refrigerator safe for 4-7 days

Low oil resistance for under 30 minutes

IDEAL FOOD APPLICATIONS

PASTA

TACOS

SOUP

BURRITO BOWLS

BPI®

COMPOSTABLE

PULP MAX™

Pulp Max™ is our ultimate pulp solution, providing outstanding resistance to moisture, oil and grease.

- Enhanced resistance to moisture permeation, oil and grease
- Microwavable and refrigerator safe
- Ideal for hot, cold and oily foods, with dine in, takeout and delivery
- Suitable for direct hot oil food applications, such as fried food and proteins
- Reduces “soggy” bottoms with warm foods

Refrigerator safe
for 4-7 days

High oil resistance
for 30 minutes to
2 hours
